

TYRIQUE DANIEL

SENIOR AI SOLUTIONS ENGINEER | AUTOMATION & INTEGRATIONS

Denver, CO • 628-303-8011 • tyrique1.daniel@gmail.com

Portfolio: ty-dev-port.vercel.app | GitHub: github.com/techwithty

PROFESSIONAL SUMMARY

Senior AI Solutions Engineer with 8+ years of experience designing and delivering production software, AI-enabled workflows, API integrations, and cloud infrastructure. Strong background in TypeScript, Python, React/Next.js, Node.js, PostgreSQL, AWS, Google Cloud, and workflow orchestration. Experienced in translating business requirements into scalable technical solutions, integrating CRM and third-party platforms, automating operational workflows, and guiding products from discovery through deployment. Combines hands-on engineering depth with strong cross-functional communication across customers, product teams, and engineering organizations.

CORE TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go

Applications: React, Next.js, Node.js, Django

Integrations: REST APIs, GraphQL, Webhooks, CRM Integrations

AI & Data: LLMs, AI Agents, PySpark, PostgreSQL

Cloud & Delivery: AWS, Google Cloud, Docker, Kubernetes

PROFESSIONAL EXPERIENCE

Deal Scale — Lead Software Engineer | Jul 2025 - Present

Denver, CO - Remote

- Architected an AI sales automation platform that integrated LLMs, CRM systems, APIs, webhooks, and workflow services to automate lead enrichment, qualification, follow-up, and multi-channel outreach.
- Designed event-driven infrastructure with Apache Pulsar, Kubernetes, Docker, and Redis/Valkey, supporting 40% growth in platform workloads without performance degradation.
- Built reusable CRM integration patterns that synchronized customer data, campaign activity, and workflow state across external automation platforms.
- Developed AI agent orchestration that combined business rules, structured data, APIs, and language models to execute customer-facing sales workflows.
- Engineered data-ingestion and enrichment pipelines processing 140M+ property records, improving the data foundation for lead scoring, personalization, and automated decisions.

CoVoice — Founding Engineer | Dec 2024 - Jun 2025

Denver, CO - Hybrid

- Translated product requirements into a cross-platform communication architecture using React Native, Django, Java, Go, PostgreSQL, and cloud services.
- Optimized Django APIs and PostgreSQL data-access patterns for real-time workloads, reducing API response times by 50%.
- Integrated AI speech and language-processing workflows with AWS, Apache Ray, and Kubernetes, reducing inference latency by 40%.
- Built CI/CD and deployment workflows with GitHub Actions, Docker, Kubernetes, and Terraform, reducing manual iOS and Android deployment errors by 60%.
- Led technical coordination across a distributed engineering team, converting product goals into implementation plans, deployment workflows, and production releases.

Google DeepMind — Full Stack AI Engineer | Mar 2023 - Dec 2024

Mountain View, CA - Remote

- Developed full-stack AI applications with React, Next.js, Python, Django, Flask, and PostgreSQL, connecting production AI services to user-facing workflows.
- Designed distributed AI infrastructure using Google Cloud, Kubernetes, Apache Ray, Redis, and Docker, reducing AI response time by 40% under high-demand workloads.
- Built PySpark and Pandas pipelines that reduced real-time and batch data-processing time by 50%.
- Partnered across product, engineering, and infrastructure teams to integrate AI capabilities into scalable production systems.

Google — Senior Full Stack Engineer | Feb 2022 - Mar 2023

Remote

- Built scalable TypeScript, JavaScript, React, and Go applications, translating product and UX requirements into maintainable production software.
- Designed backend services and APIs that supported large-scale application workflows.
- Built CI/CD and testing workflows that reduced deployment time by 40% while improving release consistency.

StayBeyondGreen — Lead Full Stack Developer | Dec 2020 - Feb 2022

Remote

- Built responsive product experiences and backend integrations with React, Node.js, Express, Apollo, and GraphQL, reducing page load times by 30%.
- Redesigned application data flow and backend services, improving application performance by 25%.

Modis (Akkodis) — Front End Developer | Aug 2018 - Jul 2020

Remote

- Developed and maintained React, JavaScript, CSS, Bootstrap, and SCSS web applications, improving site performance and user experience.
- Introduced lazy loading, memoization, and efficient state management, increasing site traffic by 20% while improving accessibility and cross-browser reliability.

Powermoves and Pumps — Web Developer | Nov 2016 - Dec 2018

Contract

- Developed and maintained client web applications using HTML5, CSS, and JavaScript, aligning functionality with business requirements and improving user engagement by 20%.
- Optimized front-end code for responsive, cross-platform delivery, reducing page load times by 30% and improving accessibility across devices.

EDUCATION

Western Governors University — Bachelor of Science, Software Engineering (2020 - 2023)

CERTIFICATIONS

-
- Google Professional Cloud Architect
 - Meta Front-End Developer Professional Certificate
 - Hugging Face Transformers Certification
