

TYRIQUE DANIEL

FORWARD DEPLOYED ENGINEER | AI SOLUTIONS & INTEGRATIONS

Denver, CO • 628-303-8011 • tyrique1.daniel@gmail.com

Portfolio: ty-dev-port.vercel.app | GitHub: github.com/techwithty

PROFESSIONAL SUMMARY

Forward Deployed Engineer with 8+ years of experience translating customer and business requirements into production AI-enabled software, integrations, and cloud deployments. Hands-on across TypeScript, Python, React/Next.js, Node.js, PostgreSQL, REST APIs, webhooks, AWS, Google Cloud, Docker, and Kubernetes. Experienced in discovery, solution design, implementation, data integration, workflow automation, and production delivery for complex customer-facing systems.

CORE TECHNICAL SKILLS

Customer Delivery: Technical Discovery, Solution Design, Implementation, Stakeholder Alignment

Applications: TypeScript, Python, React, Next.js

Integrations: REST APIs, GraphQL, Webhooks, CRM Integrations

AI & Data: LLMs, AI Agents, PostgreSQL, PySpark

Cloud Delivery: AWS, Google Cloud, Docker, Kubernetes

PROFESSIONAL EXPERIENCE

Deal Scale — Lead Software Engineer | Jul 2025 - Present

Denver, CO - Remote

- Partnered with business stakeholders to translate sales-automation requirements into production workflows integrating LLMs, CRM systems, APIs, webhooks, and multi-channel outreach.
- Designed reusable integration patterns that synchronized customer data, campaign activity, and workflow state across CRM and automation platforms.
- Built AI-agent orchestration combining business rules, structured data, APIs, and language models to execute customer-facing qualification and follow-up workflows.
- Engineered event-driven services with Apache Pulsar, Kubernetes, Docker, and Redis/Valkey, supporting reliable asynchronous processing as platform workloads grew 40%.
- Developed enrichment pipelines processing 140M+ property records, strengthening lead scoring, personalization, and automated decision-making.

CoVoice — Founding Engineer | Dec 2024 - Jun 2025

Denver, CO - Hybrid

- Converted product requirements into a cross-platform communication architecture using React Native, Django, Java, Go, PostgreSQL, and AWS.
- Designed APIs and backend services for real-time communication, speech processing, and mobile workflows; optimized Django and PostgreSQL access patterns to reduce API response times by 50%.
- Integrated AI speech and language-processing services with AWS, Apache Ray, and Kubernetes, reducing inference latency by 40%.
- Established CI/CD and deployment workflows with GitHub Actions, Docker, Kubernetes, and Terraform, reducing manual iOS and Android deployment errors by 60%.
- Coordinated technical delivery across a distributed engineering team from discovery through production releases.

Google DeepMind — Full Stack AI Engineer | Mar 2023 - Dec 2024

Mountain View, CA - Remote

- Delivered full-stack AI applications connecting React and Next.js experiences with Python, Django, Flask, and PostgreSQL services.

- Built distributed AI infrastructure on Google Cloud, Kubernetes, Apache Ray, Redis, and Docker, reducing AI response time by 40% under high-demand workloads.
- Created PySpark and Pandas pipelines that reduced real-time and batch data-processing time by 50%.
- Collaborated across product, engineering, and infrastructure teams to deploy AI capabilities into scalable production systems.

Google — Senior Full Stack Engineer | Feb 2022 - Mar 2023

Remote

- Built scalable TypeScript, JavaScript, React, and Go applications from product requirements through production release.
- Designed backend services and APIs supporting large-scale application workflows.
- Built CI/CD and testing workflows that reduced deployment time by 40% while improving release consistency.

StayBeyondGreen — Lead Full Stack Developer | Dec 2020 - Feb 2022

Remote

- Built product experiences and backend integrations with React, Node.js, Express, Apollo, and GraphQL, reducing page load times by 30%.
- Redesigned application data flow and backend services, improving application performance by 25%.

Modis (Akkodis) — Front End Developer | Aug 2018 - Jul 2020

Remote

- Developed React, JavaScript, CSS, Bootstrap, and SCSS web applications, improving site performance and user experience.
- Introduced lazy loading, memoization, and efficient state management, increasing site traffic by 20% while improving accessibility and cross-browser reliability.

Powermoves and Pumps — Web Developer | Nov 2016 - Dec 2018

Contract

- Delivered client web applications using HTML5, CSS, and JavaScript, aligning functionality with business requirements and improving engagement by 20%.
- Optimized responsive, cross-platform front-end delivery, reducing page load times by 30% and improving accessibility across devices.

EDUCATION

Western Governors University — Bachelor of Science, Software Engineering (2020 - 2023)

CERTIFICATIONS

-
- Google Professional Cloud Architect
 - Meta Front-End Developer Professional Certificate
 - Hugging Face Transformers Certification
