

TYRIQUE DANIEL

SENIOR BACKEND & PLATFORM ENGINEER

Denver, CO • 628-303-8011 • tyrique1.daniel@gmail.com

Portfolio: ty-dev-port.vercel.app | GitHub: github.com/techwithty

PROFESSIONAL SUMMARY

Senior Backend and Platform Engineer with 8+ years of experience building APIs, distributed systems, event-driven services, cloud infrastructure, and data-processing platforms. Strong background in Python, Node.js, Go, PostgreSQL, Redis, Apache Pulsar, Kubernetes, AWS, and Google Cloud. Experienced in designing scalable backend architectures, asynchronous processing systems, observability platforms, CI/CD pipelines, and large-scale data workflows for AI-enabled products.

CORE TECHNICAL SKILLS

Languages: Python, Node.js, Go, TypeScript

Backend: Django, FastAPI, REST APIs, PostgreSQL

Data: PySpark, Pandas, Redis/Valkey, Data Pipelines

Distributed Systems: Apache Pulsar, Microservices, Event-Driven Systems, Apache Ray

Cloud & DevOps: AWS, Google Cloud, Kubernetes, Docker

PROFESSIONAL EXPERIENCE

Deal Scale — Lead Software Engineer | Jul 2025 - Present

Denver, CO - Remote

- Designed an event-driven backend architecture using Apache Pulsar, Kubernetes, Docker, PostgreSQL, and Redis/Valkey for scalable asynchronous AI and workflow workloads.
- Built observability across distributed services with OpenTelemetry, Prometheus, Grafana, Loki, and Tempo, improving bottleneck detection and production diagnostics.
- Developed backend services and workflow orchestration integrating APIs, CRM platforms, LLMs, and structured business rules.
- Engineered PySpark and Pandas pipelines processing 140M+ records for enrichment, scoring, and personalization.
- Supported 40% growth in platform workloads without performance degradation through scalable service and infrastructure design.

CoVoice — Founding Engineer | Dec 2024 - Jun 2025

Denver, CO - Hybrid

- Owned backend architecture for a cross-platform communication product using Django, Java, Go, PostgreSQL, AWS, and React Native.
- Optimized Django APIs and PostgreSQL data-access patterns for real-time workloads, reducing API response times by 50%.
- Built CI/CD pipelines with GitHub Actions, Docker, Kubernetes, and Terraform, reducing manual iOS and Android deployment errors by 60%.
- Integrated AI speech workflows with AWS, Apache Ray, and Kubernetes, reducing inference latency by 40%.

Google DeepMind — Full Stack AI Engineer | Mar 2023 - Dec 2024

Mountain View, CA - Remote

- Built production Python, Django, Flask, and PostgreSQL services supporting AI applications and user-facing workflows.
- Designed distributed AI infrastructure with Google Cloud, Kubernetes, Docker, Apache Ray, and Redis, reducing AI response time by 40%.
- Developed PySpark and Pandas pipelines for multimillion-row real-time and batch datasets, reducing processing time by 50%.

- Partnered with product, engineering, and infrastructure teams to operate reliable production AI systems.

Google — Senior Full Stack Engineer | Feb 2022 - Mar 2023

Remote

- Designed backend services and APIs supporting large-scale application workflows using Go, TypeScript, JavaScript, and React.
- Contributed to system design, technical planning, and cross-functional engineering decisions.
- Built CI/CD and testing workflows that reduced deployment time by 40% and improved release consistency.

StayBeyondGreen — Lead Full Stack Developer | Dec 2020 - Feb 2022

Remote

- Built Node.js, Express, Apollo, and GraphQL services alongside React applications, reducing page load times by 30%.
- Designed backend services and API architecture, improving application performance by 25%.

Modis (Akkodis) — Front End Developer | Aug 2018 - Jul 2020

Remote

- Developed and maintained React, JavaScript, CSS, Bootstrap, and SCSS web applications, improving site performance and user experience.
- Introduced lazy loading, memoization, and efficient state management, increasing site traffic by 20% while improving accessibility and reliability.

Powermoves and Pumps — Web Developer | Nov 2016 - Dec 2018

Contract

- Developed client web applications with HTML5, CSS, and JavaScript, improving engagement by 20% through business-aligned functionality.
- Improved responsive front-end performance, reducing page load times by 30% and improving accessibility across devices.

EDUCATION

Western Governors University — Bachelor of Science, Software Engineering (2020 - 2023)

CERTIFICATIONS

- Google Professional Cloud Architect
- Meta Front-End Developer Professional Certificate
- Hugging Face Transformers Certification
