

TYRIQUE DANIEL

TECHNICAL LEAD | FOUNDING ENGINEER

Denver, CO • 628-303-8011 • tyrique1.daniel@gmail.com

Portfolio: ty-dev-port.vercel.app | GitHub: github.com/techwithty

PROFESSIONAL SUMMARY

Technical Lead and Founding Engineer with 8+ years of experience architecting, building, and scaling production software across startup and enterprise environments. Experienced in full-stack development, AI systems, distributed architecture, cloud infrastructure, data pipelines, CI/CD, and engineering leadership. Proven ability to take products from early requirements through architecture, implementation, deployment, observability, and production operation. Strong hands-on background in TypeScript, React/Next.js, Node.js, Python, PostgreSQL, AWS, Google Cloud, Docker, and Kubernetes, with experience leading distributed teams and collaborating across product, design, infrastructure, and business stakeholders.

CORE TECHNICAL SKILLS

Architecture: System Design, Microservices, Event-Driven Systems, API Design

Product Engineering: React, Next.js, TypeScript, React Native

Backend & Data: Node.js, Python, PostgreSQL, Redis/Valkey

Cloud Platform: AWS, Google Cloud, Kubernetes, Terraform

Leadership: Technical Strategy, Team Leadership, Architecture Reviews, Cross-Functional Delivery

PROFESSIONAL EXPERIENCE

Deal Scale — Lead Software Engineer | Jul 2025 - Present

Denver, CO - Remote

- Led architecture and development for a production AI sales automation platform spanning web applications, AI services, workflow orchestration, data processing, and cloud infrastructure.
- Designed an event-driven architecture with Apache Pulsar, Kubernetes, Docker, PostgreSQL, and Redis/Valkey that supported 40% platform-workload growth without performance degradation.
- Established production observability with OpenTelemetry, Prometheus, Grafana, Loki, and Tempo, reducing time to identify bottlenecks across distributed services.
- Designed AI agent and workflow systems integrating LLMs, APIs, CRM platforms, and business rules for automated sales operations.
- Built data-ingestion pipelines processing 140M+ property records, enabling enrichment, scoring, and personalization at scale.

CoVoice — Founding Engineer | Dec 2024 - Jun 2025

Denver, CO - Hybrid

- Owned full-stack architecture for a cross-platform communication product using React Native, Django, Java, Go, PostgreSQL, and AWS.
- Optimized Django APIs and PostgreSQL data-access patterns for real-time workloads, reducing API response times by 50%.
- Built CI/CD pipelines using GitHub Actions, Docker, Kubernetes, and Terraform, automating iOS and Android deployments and reducing manual deployment errors by 60%.
- Led technical execution across a globally distributed development team, establishing development workflows, code-review practices, and delivery processes.

Google DeepMind — Full Stack AI Engineer | Mar 2023 - Dec 2024

Mountain View, CA - Remote

- Designed and delivered production AI applications across frontend, backend, data, and infrastructure layers.

- Built distributed AI infrastructure with Google Cloud, Kubernetes, Docker, Apache Ray, and Redis, reducing AI response time by 40%.
- Designed PySpark and Pandas pipelines for multimillion-row datasets, reducing processing time by 50%.
- Automated production infrastructure and deployment using GitHub Actions and Terraform, improving release consistency across environments.

Google — Senior Full Stack Engineer | Feb 2022 - Mar 2023

Remote

- Designed large-scale full-stack applications using TypeScript, JavaScript, React, and Go.
- Contributed to architecture reviews, technical planning, and cross-functional engineering decisions.
- Built CI/CD and testing workflows that reduced deployment time by 40% and improved release consistency.

StayBeyondGreen — Lead Full Stack Developer | Dec 2020 - Feb 2022

Remote

- Led development of full-stack applications using React, Tailwind CSS, Node.js, Express, Apollo, and GraphQL, reducing page load times by 30%.
- Designed backend services and API architecture, improving application performance by 25%.

Modis (Akkodis) — Front End Developer | Aug 2018 - Jul 2020

Remote

- Developed and maintained React, JavaScript, CSS, Bootstrap, and SCSS web applications, improving site performance and user experience.
- Introduced lazy loading, memoization, and efficient state management, increasing site traffic by 20% while improving accessibility and cross-browser reliability.

Powermoves and Pumps — Web Developer | Nov 2016 - Dec 2018

Contract

- Developed and maintained client web applications using HTML5, CSS, and JavaScript, translating requirements into improved functionality and a 20% increase in engagement.
- Improved responsive and cross-platform delivery through front-end performance optimization, reducing page load times by 30% and improving accessibility.

EDUCATION

Western Governors University — Bachelor of Science, Software Engineering (2020 - 2023)

CERTIFICATIONS

- Google Professional Cloud Architect
- Meta Front-End Developer Professional Certificate
- Hugging Face Transformers Certification
