

TY DANIEL

“

| DATA SCIENTIST
| FULL STACK DEV
| SYSTEMS ENG

Contact

Phone

+1 628 303 8011

Email

tyrique1.daniel@gmail.com

Location

Denver, CO

Certifications

- IBM AI Engineering Professional Certificate
- Microsoft Certified: Azure AI Engineer Associate
- CASP
- CISSP
- Google Professional Data Engineer Certification

Expertise

- TensorFlow
- PyTorch
- Sci-kit learn
- Pandas
- Python, R, SQL, Matlab
- NumPy
- CI/CD, Unit testing, Git
- React/ReactNative/TS

Education

Bachelors
Software
Development

Associate
Computer Science

Western Governors
University
2020-2023 BA

Florida A&M
University
2014 - 2016 AA

Experience

AI Training Expert - Advanced Coder | Outlier | 07/2024 - Present

- Developed and implemented AI training programs that improved model accuracy by 30%, enabling successful deployment across fields such as healthcare, finance, and autonomous systems.
- Collaborated with cross-functional teams to create machine learning solutions, resulting in a 20% reduction in processing time for critical data analysis tasks.
- Led the integration of novel AI methodologies into existing systems, achieving a 15% increase in automation efficiency and reducing manual intervention by 25%.
- Conducted comprehensive analyses of AI models to identify and resolve inefficiencies, enhancing model robustness and scalability by 40%.
- Designed and maintained experimental frameworks for AI research, ensuring reproducibility and scalability across decentralized systems, leading to a 50% increase in research output.
- Fostered a culture of continuous learning by organizing workshops and training sessions, which improved team proficiency in AI development by 35%.
- Contributed to research and development initiatives, publishing findings that resulted in a 25% increase in publication acceptance rate at leading AI conferences.

ML-Research Engineer/ Trainer | Data Scientist | Deep Mind | 03/2023 - 08/2024

- Led the design, training, and optimization of machine learning models using TensorFlow and PyTorch, resulting in a 25% improvement in model accuracy and a 15% reduction in training time.
- Implemented feature engineering techniques, such as vectorization and dimensionality reduction, to enhance model performance by 20%.
- Slowed development time by 30% by finding and using open-source LLM models, contributing to more efficient project timelines.
- Streamlined AI testing using Retrieval-Augmented Generation (RAG) systems, reducing testing time by 40% and enhancing model robustness.
- Built and managed scalable ML infrastructure with Docker and Kubernetes, ensuring efficient deployment and integration of AI solutions across distributed systems.
- Collaborated with interdisciplinary teams to align AI initiatives with business objectives, leading to a 15% increase in project efficiency.
- Published findings, Trends and New AI technology increasing acceptance rate by 25%.

Ai Automation Engineer (Google) | 02/2022 - 01/2023

- Developed and managed CI/CD pipelines, streamlining deployment processes and reducing time to production by 25%.
- Utilized behavior-driven development (BDD) with Gherkin to create clear, executable specifications, significantly improving software quality and reliability.
- Implemented React with Redux in a component-based architecture, enhancing code maintainability and reducing bugs by 20%.
- Adopted TDD and BDD methodologies with Jest and Cypress, which improved application reliability and scalability by 30%.
